EDWARD J. LAPEROUSE METAL WORKS, INC.

Today, Edward J. Laperouse Metal Works, Inc. provides commercial low slope and standing seam metal roof installations. It is a certified applicator for ULTRASEAM, SIPLAST, GAF and other roofing systems. In addition, it is also an authorized Ultraseam Manufacturer, producing state of the art standing seam metal roofing systems, which are manufactured on the jobsite for optimum efficiency.

Laperouse built roofs protect hundreds of schools, churches, banks, office, civic and other commercial buildings. We have the capability of retrofitting existing roof structures to add additional slope to accommodate new standing seam metal roofs.

As licensed General Contractors, we have the ability and experience to coordinate all trades including mechanical, electrical and interior disciplines to provide the owner with a comprehensive turnkey roofing and renovation project. We have successfully completed roofing projects in excess of 200,000 square feet.

Our commitment to quality workmanship is evidenced by our most important asset, our skilled craftsmen. Many of them have been practicing their trade with us for 30 years or more. We stand behind their work and their personal commitment to quality.

We have been members of the National Roofing Contractors Association (NRCA) since 1977; participating in numerous association programs since that time. Our president has served as an officer for the association and continues to serve on technical, education and legal committees. We are also members of the National Roofing Legal Resource Center and our firm is a charter governor of the Roofing Industry Alliance for Progress in support of the National Roofing Foundation and its work on behalf of the roofing industry.

Our commitment to this industry and to our customers is as meaningful today as it was yesterday and will be tomorrow.

VISION & MISSION STATEMENT

Vision Statement

“To be the first choice in the commercial roofing business” - The first choice is the best choice

Mission Statement

Our mission remains as it has since 1935. We are committed to utilizing the best workers and proven technology to provide quality roofing products that offer longer life and greater value to our customers.

- In support of the commitments we pledge:

- 1) To utilize our over 70 years of knowledge and experience in providing our customers with long-term and cost effective solutions
- 2) To be honest and straightforward with our customers answering all questions pertaining to our work
- 3) To commit to our employees, the necessary skills and resources needed to perform the job safely, effectively, and efficiently.
- 4) To stand behind our work

Planners**

315 East 2nd Street
Thibodaux, LA 70301

Contact: Skipper Holloway, AIA
Phone: 985-447-9229

Project Information (2002): This new construction project utilized a 16" wide by 2" tall Kynar finish standing seam roof panel with stucco embossed surface. Total roof area is 200,000 square feet. Roof panel lengths are around 58 feet. Most roofs were two stories high and our panel machine was lifted to the roof surface allowing the panels to be run and stacked on the roof before installation.

St. John the Evangelist
